EDUCATION

St.Mary's Matriculation Higher
Secondary School 2023
76.17% in 12th Grade

Anand Institute of Higher Technology
2023 – 2027
B.E Computer Science and Engineering
GPA: 8.12

TECHNICAL SKILL

- Languages:** Java • Kotlin • Dart • JavaScript • Python • C • SQL
- Database:** PostgreSQL • MongoDB • Redis • MySQL
- Backend:** Spring Boot • FastAPI • JPA • REST API • JWT • OAuth
- Frontend:** React • Next.js • HTML • CSS • JavaScript
- Mobile:** Flutter • Android Studio
- Tools:** Git • GitHub • Postman • Docker • Firebase • Wireshark

HACKATHONS & AWARDS

- Innoclash'26 – Reality Ready Award Winner
- Intellithon'25 – Zoho National Hackathon
- Thinkathon 9.0 – Google Genesis Club
- Code Sangram 2.0 – 4-days Bangalore Hackathon

LINGUISTIC

- English
- Tamil

PROFILE SUMMARY

Computer Science Engineering student at Anand Institute of Higher Technology (AIHT) with hands-on experience in Java, Spring Boot, Flutter, and full-stack development. Passionate about building production-ready software with scalable backend systems, clean architecture, AI integrations, and intuitive user experiences. Continuously learning through internships, hackathons, and real-world projects.

PROJECTS & INTERNS

Project - Enterprise Banking Management System 2026
Tech Stack: Spring Boot • Spring Security • React • PostgreSQL • JWT • JPA

- Developed a full-stack banking platform featuring secure authentication, account management, beneficiary management, fund transfers, transaction history, and role-based access control.
- Implemented enterprise-grade security using JWT authentication, Spring Security, OTP verification, and encrypted credential management.
- Designed scalable REST APIs with PostgreSQL persistence, enabling modular architecture for banking operations and future feature expansion.

Project - Semmolzhi: AI-Powered Government Service Platform 2025
Tech Stack: React • Node.js • Express.js • Python • MongoDB Atlas • Zoho Catalyst • RAG

- Developed an AI-powered platform that helps users discover government schemes and simplifies digital government services through an intelligent conversational assistant.
- Integrated a Retrieval-Augmented Generation (RAG) chatbot with multilingual support, secure JWT authentication and OTP verification.
- Implemented an automated GST registration workflow with draft management, progress tracking, and backend automation for processing user-submitted information.

Project – ORChat: Unified AI Chat Platform 2026
Tech Stack: React • Next.js • Capacitor • OpenRouter API • JWT • REST APIs

- Developed a cross-platform AI chat application supporting multiple Large Language Models through OpenRouter with Bring Your Own API Key (BYOK) functionality.
- Built secure user authentication, conversation history, model switching, and responsive interfaces for both web and mobile using React and Capacitor.
- Designed a scalable architecture enabling seamless integration of new AI providers while maintaining a consistent chat experience across platforms.

Internship - Java Full Stack | Dvein Innovation Pvt. Ltd. 2026
Duration: 1 Month | On-Campus

- Developed authentication, account management, and transaction modules for an enterprise banking management system.
- Built secure REST APIs using Spring Boot, Spring Security, JWT, JPA, and PostgreSQL while collaborating in a 5-member development team.
- Followed enterprise development practices including role-based authentication, API testing, Git-based collaboration.
