QUALIFICATION

Anand Institute of Higher Technology

2023 – 2027

- B.E Computer Science and Engineering
- GPA: 8.12

TECHNICAL SKILL

- Languages:** Java • JavaScript • Python • C • SQL
- Database:** PostgreSQL • MongoDB • Redis • MySQL
- Backend:** Spring Boot • FastAPI • JPA • REST API • JWT • OAuth
- Frontend:** React • Next.js
- Mobile:** Flutter • Android Studio
- Tools:** Git • GitHub • Postman • Docker • Firebase • Wireshark

SOFT SKILL

- Communication
- Team Collaboration
- Adaptability
- Time Management
- Quick Learner
- Continuous Learning

PROJECTS

AI Multi-Model Chat Platform

- Developed a cross-platform AI chat application using React, Next.js, and Capacitor with OpenRouter multi-LLM integration.
- Implemented JWT authentication, BYOK, conversation history, model switching, and responsive web/mobile interfaces.

AI Government Services Portal

- Developed an AI-powered government portal featuring a multilingual RAG chatbot and secure user authentication.
- Automated GST registration with secure authentication, draft management, progress tracking, and backend workflow automation.

LANGUAGES KNOWN

- Tamil
- English

PROFILE SUMMARY

Computer Science Engineering student at Anand Institute of Higher Technology (AIHT) with practical experience in Java, Spring Boot, Flutter, and full-stack development. Skilled in developing scalable applications with clean architecture while continuously enhancing technical expertise through projects, internships, and hackathons.

INTERNSHIPS & WORKSHOPS

Java Full Stack Internship - Dvein Innovation Pvt. Ltd.

2026

- Built authentication, account management, and transaction modules using Java, Spring Boot, Spring Security, JWT, JPA, and PostgreSQL.
- Developed secure REST APIs, implemented role-based authentication, performed API testing, and collaborated in a 5-member Agile team using Git.

LLM & Generative AI Workshop - GenOrcasX

2026

- Explored Large Language Models (LLMs), Hugging Face, and Groq, gaining hands-on experience with modern Generative AI workflows.
- Learned prompt engineering, system prompts, temperature, top-k sampling, quantization, and LLM inference optimization.

Web Development Internship - MotionCut

2025

- Developed a Flipkart-inspired full-stack grocery e-commerce platform with real-time product browsing, cart, wishlist, and secure checkout.
- Implemented seller management, Leaflet-based order tracking, responsive UI, and scalable REST APIs for an interactive shopping experience.

Microservices & Containerization Workshop - SSN College

2025

- Explored microservices architecture, containerization, and service-oriented application development for scalable software systems.
- Acquired hands-on experience with containerized deployment workflows and enterprise backend development practices.

ACHIEVEMENTS

- Innoclash'26 – Reality Ready Award Winner** - Awarded the Reality Ready Award for developing an AI-powered government services platform with real-world impact.
- Intellithon'25 – Zoho National Hackathon** - Participated in a 24-hour national hackathon, collaborating to design and develop an innovative software solution.
- Thinkathon 9.0 – Google Genesis Club** - Participated in an AI-focused innovation event, exploring practical applications of Generative AI and LLM technologies.
- Code Sangram 2.0 – Bangalore Hackathon** - Participated in a four-day hackathon, collaborating on end-to-end software development and rapid prototyping.

CERTIFICATIONS

- Java Full Stack Intern
- Web Development Intern
- SSN Spring Boot Workshop
- MongoDB Atlas Skill
- Oracle Java Foundation
